HT-8865 Non-contact IR Thermometer Gun with Dual Laser

Model 8865

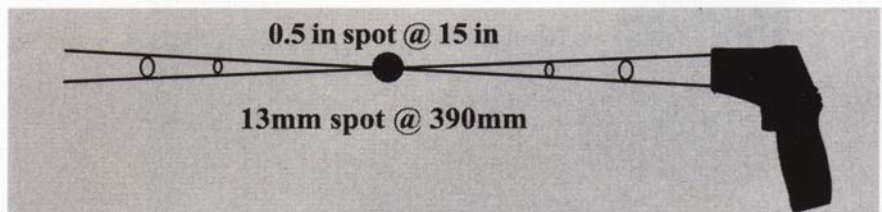

HT-8865 is a CE certified digital non-contact infrared thermometer with built-in dual laser pointers and back-light LCD display. This compact device has a narrow 30:1 distance to spot ratio and a wide range of -58 °F to 1832 °F (-50 °C to 1000 °C). Forget the old analog devices, this newly designed digital light-weight device gives you long lasting power with accurate measurement from safe distance. The built-in dual laser pointers help you aim better at the object for an accurate result. The back light LCD screen allows you to read easily in the dark. It also comes with a heavy duty carrying pouch to protect your device when working in the field.

FEATURES

- * Non-contact Infra-Red thermometer with laser pointer measures to 1000°C / 1832°F
- * Easy to use for measuring temperature of hot or moving objects from a safe distance
- * Narrow 30:1 field of view (measure 1" target at 30" distance)
- * Built-in dual laser pointers to improve aim
- * Fast sampling time (less than 150ms)
- * °C / °F switchable and Auto Power Off
- * Auto-Hold after releasing the trigger button
- * Max temperature display
- * High and low alarms
- * Light weight compact design
